

ADC

WHERE THOUGHTFUL DESIGN MEETS EXCELLENCE

Beyond Design, Beyond Expectations

ADC Design Group Company Profile

Company Introductions

Originally established in 2000 as "A Design Concept" by Mr. Arthur Chan, ADC Design Group Ltd. has consistently adhered to a core design philosophy that bridges user-centric principles with commercial efficacy and spatial aesthetics. The practice is dedicated to delivering comprehensive, high-caliber, and market-competitive design solutions across all phases of development. Driven by deep architectural expertise and rigorous execution, ADC has established a distinguished track record within the industry, earning widespread acclaim and enduring strategic partnerships with prestigious clients.

In response to evolving market dynamics and expanding regional demands, ADC has successfully broadened its footprint from Hong Kong, Macao, and Mainland China into international markets across Southeast Asia. Guided by our service rationale "Client Focused, People Centric" we recognize that an elite team is fundamental to delivering complex commercial developments. To adapt to sophisticated mixed-use projects, we continuously elevate our organizational capabilities through studio infrastructure upgrades and the strategic recruitment of top-tier international design talents, cultivating an agile, highly efficient, and multidisciplinary practice with a global perspective.

In 2023, the firm officially rebranded as "ADC Design Group Ltd.", marking a significant milestone in its evolution toward a full-service international design consultancy. Today, ADC operates as an integrated consultancy encompassing Architectural Design, Interior Architecture, Landscape Architecture, and Multi-Disciplinary Coordination, specializing in master planning and technical execution for complex developments.

Our expertise spans luxury hospitality, high-end private clubs, bespoke dining spaces, integrated entertainment resorts, Class A office towers, and ultra-luxury residences. ADC’s scope of practice covers the complete project lifecycle from pre-development positioning and conceptual master planning to design development, technical resolution, and site contract administration. Across every discipline, ADC maintains unwavering quality control paired with innovative design thinking. Our clients’ recognition of our ability to harmonize spatial artistry with commercial value remains the fundamental driving force behind ADC's pursuit of excellence.

The ADC Standards & Philosophy

At the core of ADC's operational excellence is our seamlessly Integrated Design Workflow. We believe that exceptional design represents a dynamic equilibrium between aesthetic narrative, spatial functionality, and commercial efficiency. By exercising meticulous control across every phase from space planning and detail engineering to environmental graphics we eliminate interdisciplinary friction and guarantee total design integrity from concept to completion.

Our commitment is straightforward : to guide clients through a collaborative, highly creative design journey that consistently exceeds expectations. With an unyielding sense of professional stewardship, the ADC team ensures that every design intent is rigorously realized, delivering unparalleled, turnkey consultancy services to our clients.

We Shape Landmark Buildings and Engaging Environments

ADC Design Group’s acclaimed Architecture Studio creates profitable, unforgettable, and exceptional places across integrated resorts, casinos, entertainment venues, hotels, convention centers, retail centers, and mixed-use districts. Based in Hong Kong, China with satellite offices in Singapore and Cambodia, our elite team of architects, designers, planners, and artists has delivered more than 300 projects, establishing ADC as a respected authority in the hospitality, gaming, and experience-driven markets.

Worldwide Reach and Collaborative Partnerships

Our broad international practice equips us with a deep appreciation for cultural nuance, regulatory complexity, and market-specific demands. We partner closely with clients—from global operators to regional developers—ensuring design outcomes align with commercial aims and operational realities. Our work includes collaborations with prominent names such as Pullman Hotel, Mecure Hotel, Intercontinental Hotel, Peninsula Bay Hotel, Artyzen Hotels Macau, K11 Retail and Anlanton International. These engagements highlight our ability to convert strategic vision into commercially viable, operationally sound, and guest-focused destinations.

Advancing Design Excellence and Technical Mastery

Innovation drives our studio’s methodology. We marry expressive architectural language with practical operational intelligence—leveraging tools like advanced modeling, AI, BIM, VR, and performance simulation to refine spatial planning, sightlines, circulation, and service efficiencies. Our integrated teams bring strengths in master planning, façade design, structural coordination, interior programming, experiential and theatrical design, culinary and F&B strategy, and landscape integration. This comprehensive capability produces cohesive, immersive environments that strengthen brand presence and encourage repeat visitation.

Environmental Responsibility and Robustness

Sustainability underpins our approach. We design for reduced energy consumption, passive climatic strategies, efficient water management, mindful material selection, and integration of onsite renewable systems when appropriate to lower lifecycle emissions and operating expenses. Projects incorporate biophilic elements, optimized daylighting, intelligent building systems, and circular waste practices. We also factor in resilience—local climate adaptation measures, emergency planning, and redundant systems—to safeguard investments and ensure operational continuity amid evolving environmental pressures.

End-to-End Delivery and Long-Term Value

From initial site assessment and schematic design to documentation, construction oversight, and post-occupancy review, ADC manages a cohesive delivery process. We prioritize regulatory alignment, budgetary clarity, risk control, and constructability while promoting durability, adaptive potential, and maintenance-efficient detailing. The outcome is visually compelling, functionally robust environments that elevate guest experience, reinforce brand value, and drive measurable returns.

Core Design Disciplines

Architecture | Interior Design | Landscape Design

ADC Design Group

We believe great design begins with listening. At ADC, architecture, interior design and landscape design form the tri-engines of our practice, extending into lighting, branding, masterplanning, and 3D visualization - all disciplines aligned around your vision. From initial concept to final handover, we draw on two decades of craftsmanship and experience to turn your expectations into tangible reality.

Leadership Team

Arthur Chan W.F.

Founder | Chief Designer

Mr. Arthur Chan brings over 30 years of experience to the design industry, having led and participated in a wide array of projects across Canada, Hong Kong, and Macao, accumulating a profound cross-cultural vision and robust hands-on expertise. In 2000, he founded "A Design Concept," specializing in hospitality and mixed-use commercial developments.

Known for his agile and versatile design methodologies, Mr. Chan adeptly translates project positioning and regional cultures into diverse architectural styles, showcasing exceptional originality and keen market insight.

As the head of the firm, Mr. Chan shapes strategic direction while personally serving as Lead Designer. From initial concept generation and schematic design development to detail execution, he ensures that every project adheres to consistent design philosophies and rigorous quality control standards. Driven by a user-centric design ethos aligned with client commercial objectives, he delivers integrated, multidisciplinary design solutions across architecture, interior, and landscape domains. His ability to dynamically respond to varying project phases has earned him deep client trust and long-term partnerships.

In 2023, the practice officially rebranded as "ADC Design Group Ltd." To further bolster the firm’s core capabilities, Mr. Chan invited several senior practitioners to join the practice. Under his leadership, the ADC team leverages innovative design thinking and solid execution to deliver insightful, high-competitiveness design solutions for complex commercial developments.

Leadership Team

Hoo Khuen Hin

Project Partner | Design Director

Architecture

Mr. Hoo Khuen Hin joined ADC in 2021 as Head of Architectural Design, overseeing the master planning and execution of various architectural projects. He holds a Master of Architecture from the National University of Singapore. Following his graduation during China's rapid urban expansion, he relocated to Shenzhen to establish his career and founded MAPA Design Consultancy in his early years. With over 25 years of extensive practice, Mr. Hoo possesses outstanding expertise in the design, execution, and project management of large-scale real estate and mixed-use developments, paired with deep market insight into the architectural and real estate sectors across China, Singapore, and Southeast Asia.

He excels across entire project lifecycle from pre-development positioning and conceptual planning to project control seamlessly synthesizing design aesthetics, engineering technology, and commercial strategy to ensure every project balances innovation with constructability. His macro strategic vision and meticulous technical leadership inject strong architectural rigor into ADC, making him a core, indispensable contributor to the firm's multidisciplinary service model.

Paul Pan X.Q.

Project Partner | Design Director

Interior

Invited to join ADC as a key member of the interior practice, Mr. Paul Poon oversees the execution of interior design projects. With over 25 years of professional interior design experience, his portfolio spans commercial spaces, high-end private clubs, and luxury residential villas. Characterized by inventive spatial storytelling, his design approach offers a fresh lens on spatial art.Mr. Poon draws design inspiration from the subtle details of daily life, deftly infusing them into his work using modern design expressions to carve out spatial textures that are both opulent and understated. His attention to material specifications, ambient lighting, and architectural joinery details creates evocative spaces that resonate deeply with end-users. His refined aesthetic sense and dependable execution enable him to consistently craft highly signature, emotionally compelling interior environments that are widely acclaimed by clients.

Tony Li G.D.

Project Partner | Design Director

Landscape

A graduate of the Department of Architecture at Shenzhen University, Mr. Guan Dong Li has dedicated his career to large-scale urban planning and landscape architecture. Bringing over 30 years of deep real estate development and project management experience, he has led the design and implementation of numerous hotel setups and real estate developments. Having collaborated with ADC on various landscape initiatives over the years, his technical expertise, collaborative ethos, and design delivery earned strong acclaim, leading to his formal appointment to lead ADC's Landscape Architecture department. Mr. Li integrates architectural logic into landscape design, placing strong emphasis on ecological sustainability, regional context, and human scale. He effectively directs the full project life cycle, from conceptual design and design development to construction administration. His precise approach to planting design, landform grading, and spatial sequencing yields works that balance artistic expressiveness with functional utility, injecting robust professional reliability into ADC's landscape domain.

Leadership Team

Byron To, Mo Kam

Design Director

Interior

Upon graduating in Canada, Mr. Byron To practiced locally for many years, serving as Chief Designer at Celestial Design and J.Cho Design. A registered member of ARIDO (Association of Registered Interior Designers of Ontario), his professional capabilities were recognized with design awards from ARIDO in the Public Space and Hospitality/Clubhouse categories. In 2008, he relocated from Canada to Hong Kong to join ADC, managing interior design projects across Hong Kong, Macao, and overseas markets. Leveraging his broad international perspective and extensive cross-cultural experience, he was promoted to Design Director (Interior Design) in 2011.

Mr. To excels at fusing North American design methodologies with the nuanced demands of the Asian market, establishing a proven track record in high-end hospitality, private clubs, and public realm projects. As a team leader, he drives high-standard execution from design development through to technical resolution, playing a pivotal role in ADC's overseas market expansion and quality assurance.

Xu M.G.

Associate Design Director

Interior

Having joined ADC at its inception in 2001, Mr. Gavin Hui is one of the firm's founding pillars. Over his 20+ years of hands-on practice, he has advanced through multiple roles—from junior designer to project coordinator gaining an intrinsic understanding of the firm's operations and design workflows. Promoted to Project Director (Interior Design) in 2023, Mr. Hui combines a signature design voice with acute project analytical skills and cross-departmental management expertise.

He specializes in managing large-scale commercial and integrated entertainment interior projects. Mr. Hui accurately interprets client briefs and functional program requirements, adeptly coordinating resources across architecture, interiors, and landscape to ensure seamless delivery within budget and schedule constraints. His methodical approach and comprehensive expertise make him a trusted core leader, providing dependable oversight when tackling large, complex projects.

Zheng Xiaoyu

Associate Design Director

Architecture

Zheng Xiaoyu brings over a decade of architectural experience to his dual roles as former MAPA Partner and Architectural Design Team Leader. A graduate of Lanzhou Technology University with a bachelor's degree in Architecture, he began his career at the Shenzhen Municipal Design Institute (2006–2010) before joining MAPA Partner and Architectural Design Team Leader. A graduate of Lanzhou Technology University with a bachelor's degree in Architecture, he began his career at the Shenzhen Municipal Design Institute (2006–2010) before joining MAPA Design Consultancy Services in Shenzhen in 2010 and transit to ADC Group in 2021. Across education, hospitality, commercial, residential and industrial sectors, his key projects include Shenzhen Qiaoxiang School, Guangzhou Nuclear Energy Training Centre, Fujian Ningde Exhibition Hotel, Shenzhen Xinhao E-city Commercial Complex, Dongguan Songshan Lake Hubing Villa Gardens, Chengdu Jinbao Plaza, Shenzhen Tianan Cloud City and the Shenzhen Yili Mineral Water Factory Redevelopment. This diverse body of work underscores his versatility in both complex urban schemes and specialised building types.

Ma Wei

Associate Technical Director

Architecture

Ma Wei is a Chinese architectural designer and MAPA Partner who also serves as Architectural Technical Design Team Leader. He holds a bachelor's degree in Industrial and Civil Architecture from Hubei City Construction Institute. From 2001 to 2004 he worked at the Shenzhen Architectural Design Research Institute (Third Branch), then joined MAPA Design Consultancy Services in Shenzhen in 2004, where he continues to practice til joinging ADC Group in 2021. His portfolio covers large-scale residential, commercial, and master-planning projects across China, including Shenzhen Wisdom Plaza, Shantou Yunruitai, Cixi Jinmao International Plaza (155 k sqm), Shenzhen Butterfly Valley Mansions, Changsha Science Residences, Beijing Century Plaza (450 k sqm), Xi'an Sun City Estate (700 k sqm), and Jiangyin Lingang New City Masterplanning (450 k sqm). These works demonstrate his broad experience in high-density urban and mixed-use typology design. His experience in planning regulations, architectural technical details make him an indispensable force in the company.

Koh Rong Hotel and Resort

KohRong Island Cambodia

Koh Rong Hotel and Resort

Koh Rong Island Cambodia

The overall planning is to have the main hotel building (kept at 50m tall) in the middle of the site, with the casino and banquet hall on the flanks. The villas are placed mostly south of the land. The facade design uses streamlined balconies and extensive sunshading devices to counter Cambodia's strong sun, achieving a tropical modern look that reduces heat gain and energy use. The entry canopy, inspired by oceanic and floral elements, offers a grand welcome. The elongated X-form plan with curves creates four U-shaped faces that embrace the surroundings and maximize sea/mountain frontage, while terracing upward reduces visual impact on nature.

Location

The project is located at the western peninsula of Koh Rong Island, Cambodia.

Project Scale

Spanning a total land area of 75,000sqm, with a GFA of 145,000sqm. The development consists of a 50m hotel block, casino and banquet hall podium blocks and 60 villas.

Components

5-star Hotel, Casino, KTV, Spa, Villas, Townhouses, Banquet Hall

Peninsula Bay Hotel and Resort

Sihanoukville Cambodia

Peninsula Bay Hotel and Resort

Sihanoukville Cambodia

Peninsula Bay is the largest integrated resort with gaming, family activities and varied facilities in Cambodia. The complex sits on a peninsula that has a 270 degree sea view. The main hotel building, a 150m tall and 300m long S-curved building sits strategically on the site, making full use of the sea view. The 2 storey podium houses the casino, shopping mall and amenities. The 3rd floor landscape features the hotel's garden, swimming pools and a water amusement park.
The design theme of this project is to create a comprehensive entertainment resort based on the concept of the mythical animal "dragon" . On the facade of the building, champagne gold colour diamond- shaped aluminum panels and brown tinted glass and walls feature as the main elements of the entire building, forming a vivid and varied large abstract golden dragon sculpture/building.

Location

The project is located at 2 Thannou Road, Sihanoukville.

Project Scale

Spanning a total land area of 160,000sqm, with a GFA of 900,000sqm. The development consists of a 150m tall,300m long hotel block with a two storey gaming podium.

Components

5-star Hotel, Casino, Shopping Mall, KTV, Spa， Bar Street,Convention Centre, Waterpark

New Galaxy Hotel

Mong La Myanmar

New Galaxy Hotel

Mong La Myanmar

This resort hotel is proposed in Mong La, a border town near Yunnan China. The proposed development features a modern Asian style that resembles a phoenix; the architecture has rational spatial layout, balancing aesthetics with lighting and ventilation needs. Energy efficiency is achieved through integrated roof, wall, and window insulation technologies, plus Low-E insulating glass in rooms to reduce heat gain and energy consumption. The form creates a contrast of high and low volumes for a tidy, harmonious effect.

Location

The project is located in Mongo La Town, Myanmar

Project Scale

Spanning a total land area of 60,000sqm, with a GFA of 202,000sqm. The development consists of a 5-star twin hotel blocks, casino and banquet hall podium blocks .

Components

5-star Hotel, Casino, KTV, Spa, Banquet Hall

ADC DESIGN GROUP

Koh Puos Hotel and Resort

Koh Puos Island Cambodia

Koh Puos Hotel and Resort

Koh Puos Island Cambodia

This resort hotel is proposed on Koh Puos Island, west of Sihanoukville, which is a self-contained island accessed via Koh Puos Bridge. It is part of a larger 300,000sqm masterplanning district for the Koh Puos Island. Located on the north shore facing the ocean, it spans from seashore to south hillsides. The design features simple modern architecture with rational spatial layout, balancing aesthetics with lighting and ventilation needs. Energy efficiency is achieved through integrated roof, wall, and window insulation technologies, plus Low-E insulating glass in rooms to reduce heat gain and energy consumption. The form creates a contrast of high and low volumes for a tidy, harmonious effect.

Location

The project is located at the central north sea portion of Koh Puos Island, Cambodia.

Project Scale

Spanning a total land area of 100,000sqm, with a GFA of 315,000sqm. The development consists of a 5-star twin hotel blocks, casino and banquet hall podium blocks and 30 villas.

Components

5-star Hotel, Casino, KTV, Spa, Villas, Townhouses, Banquet Hall

ADC DESIGN GROUP

Wuhan K4 Mall

Wuhan China

Wuhan K4 Mall

Wuhan China

The project layout prioritizes lake views and arterial access: a 126.1m loft apartment tower to the north, terraced retail along the lake and a five-star hotel anchors the south. The lakeside retail street features terraces—internal covered arcades on floors 1–2 open to dynamic views, with stepped terraces facing the lake, connected by stairs and escalators for vertical circulation. The complex is open, permeable, and human-centric—functions independent yet linked, embodying "experience, entertainment, leisure." The strong "crystal and rock" concept for the overall project connects all buildings; uses glass and stone textures: crystal symbolizes energy, prestige, and romance; rock represents revolution and innovation. Together they create a grounded yet light, transparent commercial icon with striking visual impact for the city and a lasting shopping experience for users.

Location

The project is located along Jiangcheng Boulevard, Hanyang District, Wuhan.

Project Scale

Spanning a total land area of 89,000sqm, with a GFA of 370,0000sqm. The mixed use development consists of one 126m apartment/office tower block, a 50m high 5-star hotel and 30-40m shopping complex.

Mocbai Hotel and Resort

Mocbai Cambodia

Mocbai Hotel and Resort

Mocbai Cambodia

Located along National Road 1,170m from the Cambodia-Vietnam border in Mocbai, this 124,927m² flat site features a 293,261m² above-ground mixed-use complex including hotel, entertainment, serviced apartments, villas, bank, dormitory, banquet/KTV, and street retail. The "Water·Wave" concept shapes the hotel as a flowing wave with curved glass reflecting sky and sunlight—creating a landmark border skyline. The main hotel facade uses gray-blue Low-E glass, silver aluminum for a dynamic, modern vertical expression while the podium uses stone for a post-colonial look.

Location

The project is located along City Road 1, Mocbai, 1km away from the Vietnam Cambodia border.

Project Scale

Spanning a total land area of 125,000sqm, with a GFA of 293,000sqm. The development consists of a 140m tall hotel block with large 2 storey gaming and retail podium.

Components

Pullman Hotel

Dongguan China

Pullman Hotel

Dongguan China

The Pullman hotel and apartments presents a striking contemporary architectural identity defined by clean geometric lines and expansive glass facades combined with stone. The main building features a dynamic tiered form with flowing balconies and curtain walls that maximize natural light while offering panoramic views. A grand porte-cochère marks the dramatic entrance, supported by sleek columns creating a sophisticated arrival experience. The architecture embraces indoor-outdoor integration through spacious terraces and glass-enclosed lounges that blur interior and exterior boundaries. Warm timber accents and stone cladding add texture to the modern structure.

Location

The project is located at the intersection of Zhenan Road and Qinghai Zhong Road, Changan District, Dongguan.

Project Scale

Spanning a total land area of 50,000sqm, with a GFA of 120,000sqm, the project consists of a 5-star hotel， serviced apartments with amenities

Nanchang FDD Centre

Nanchang China

Nanchang FDD Centre

Nanchang China

The project on Nanchang's Aixi Lake east bank includes a 195.6 m supertall mixed-use tower, two 97 m towers and two 46.65 m towers arranged around a central open public space. The master plan creates a landmark skyline, links to Aixi Lake metro station, and sets landscape sight corridors to maximize lake views while protecting daylight for a north-side kindergarten. The site is fully open at grade with multiple entrances and pedestrian plazas forming a green slow-mobility network. Two retail podium levels and small street-front shops encourage fine-grained, diverse commerce. Parking is mainly underground; fire access, turn radii and egress comply with standards. Facades use granite bases, aluminum panels and high-end curtain walls for a refined commercial look.

Location

The project is located along Ziyang Boulevard, High Tech District, Nanchang.

Project Scale

Spanning a total land area of 26,786sqm, with a GFA of 183,000sqm. The development consists of one 200m office/hotel tower block, two 100m apartment blocks and two 50m SOHO/apartment blocks.

Qianhai Skyworth HQ

Shenzhen China

Qianhai Skyworth HQ

Shenzhen China

The site's best views face north and east, while the south is blocked by towers; thus we orient the design eastward to harness feng shui energy ("auspicious energy from the east"), aligning with Qianhai's water-city vision. A full-height garden atrium at the eastern corner forms a fish-mouth shape to receive positive energy. Drawing on coastal character and Qianhai's global status, the "carp leaping over the dragon gate" concept guides the design's iconic image. Though bisected by a municipal road, a bridge is devised to link the two parcels into a gateway form that dialogues with the urban axis and mitigates its feng shui impact. Office windows are angled northeast for views, with the lift cores placed on the less favorable northwest side.

Location

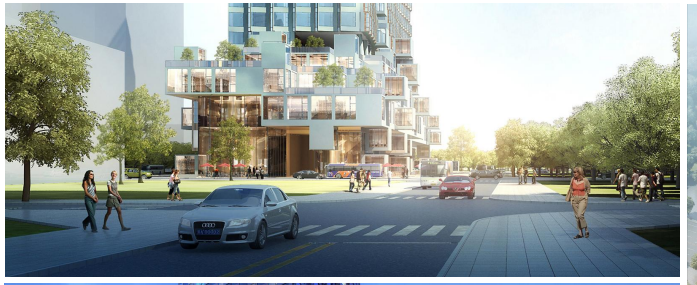

The project is located in the new Qianhai district of Shenzhen

Project Scale

Spanning a total land area of 12,490sqm, with a GFA of 90,800sqm. this HQ office complex contains two towers linked by a skybridge.

Shenzhen China

Shajing centre

Shenzhen China

In the masterplanning layout, spatial axes form along Shajing Beihuan Road and Huanzhen Road, plus an internal waterfront axis and an enclosed central space. Functionally, the west and north sides of the project along arterial roads host R&D zones, while the south adjacent to residential clusters accommodates housing support areas—achieving clear separation yet integration. Amid high-density urban renewal, ecological design is paramount. The design integrates the idea of natural hills with urban space through layout, form, and greenery, creating a vibrant, eco-green composite terraced spatial environment.

Location

The project is located south of Shajing Beihuan road and east of Huan Cheng road, Baoan District, Shenzhen.

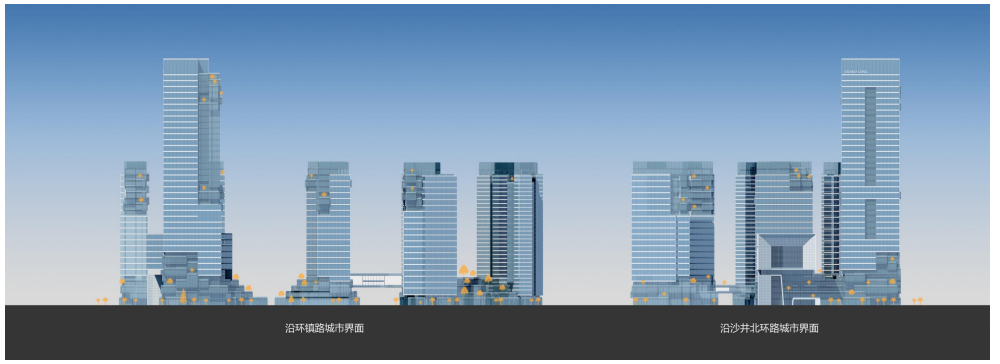

Project Scale

Spanning a total land area of 45,000sqm, with a GFA of 315,0000sqm. The mixed use development consists of seven high-tech office blocks with the tallest being 180m to the shortest 50m tall and 3 residential blocks with scattered terraced podium shopping blocks.

Songgang Plaza

Shenzhen China

Songgang Plaza

Shenzhen China

The Songgang project site, as Shenzhen's northwestern gateway, sits between Baotian and G107 avenues, demanding a design aligned with the city's skyline and master plan. Adopting a modern approach, the project prioritizes human-centric, eco-efficient spaces integrating with the landscape. It comprises two M1-class high tech multi-storied factories (ground floor 6m, floors 2-6 5.4m, above 4.5m), a 90m dormitory (6m ground, 2.1m green mezzanine, 3.9m upper floors, canteen on ground), and a low-rise commercial block, with three basement parking levels. The tower blocks line the perimeter of the site to maximum effect creating a large central sunlit landscape space for users. The facade's dynamic yet rational lines, with strong ‘red-brick’ stone panels, create a distinctive gateway identity.

Location

The project is located along Baoan Boulevard, Baoan District, Shenzhen.

Project Scale

Spanning a total land area of 15,000sqm, with a GFA of 97,0000sqm. The development consists of two 80m industrial/office tower block, one 100m apartment block and one 30m commercial block.

Tianan Cloud Valley

Shenzhen China

Tianan Cloud Valley

Shenzhen China

Located in Longgang's Huawei North New Town, this industrial site (FAR 7.7) comprises two plots within Tianan Cloud Park. To resolve high GFA and the issue of 100m height control on the buildings, a "cloud" tech concept is devised.; it unites the divided land via connecting platforms, forming a large urban complex. Towers arranged around the perimeter enclose a central courtyard, linked by the ribbon-like "cloud platform" to create a clustered industrial high-tech camps like office zone. A central garden hosts R&D areas for diverse needs. The platform solves density issues, enriches public space, creates concave spatial forms, opens tower views, reduces enclosure, and enriches the city skyline.

Location

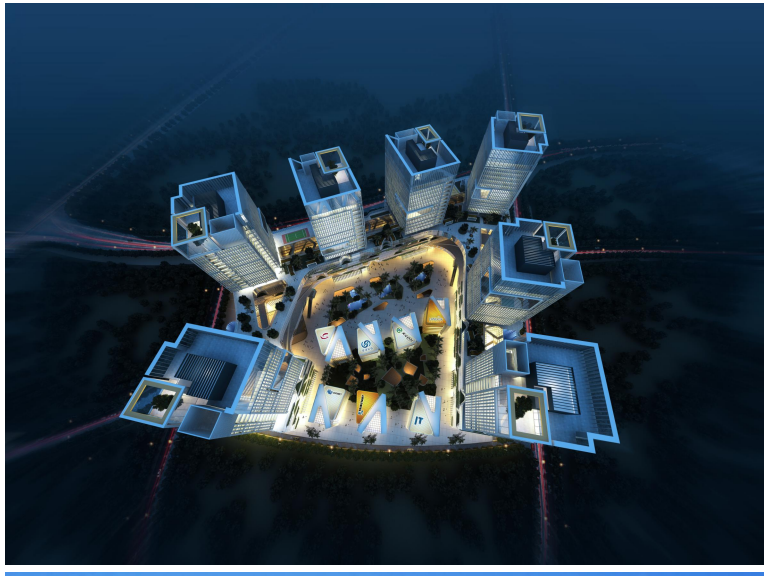

The project is located at the north of Xuegang Road and east of Limin Road, Longgang District, Shenzhen.

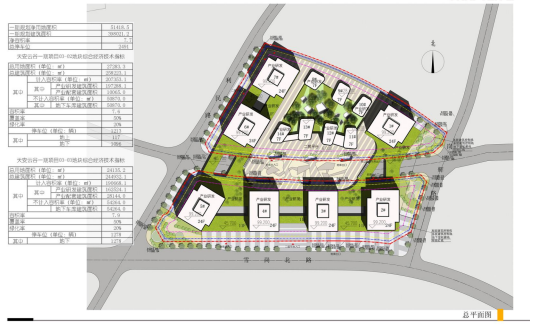

Project Scale

Spanning a total land area of 51,000sqm, with a GFA of 400,0000sqm. The development consists of seven 100m office tower blocks, sitting on a 50m raised up cloud podium block.The central area sits seven HQ office blocks.

Sunhope E-Plaza

Shenzhen China

Sunhope E-Plaza

Shenzhen China

Sunhope E Plaza is a city-wide regenerative mixed use project consisting of 2 Office blocks and 1 apartment block sitting on a shared commercial podium. Functions are rationally zoned with supporting commercial services, industrysupport residences, and large public activity areas. To preserve an urban sight corridor, a memorial axis is retained through the site: the 200m supertall Office building is placed to the west and the other two towers to the east. Layered vertical greening creates an “ecological park” emphasizing energysaving lowcarbon design, four dimensional ecology, creative park space, and an inspiration corridor. The facade of the buildings are of a minimal modern style with a single spiraling outline wrapping the buildings, giving them a clean, everlasting look.

Location

The project is located at the intersection of Beihuan Road and Caitian Road, Futian District, Shenzhen.

Project Scale

Spanning a total land area of 24,000sqm, with a GFA of 200,000sqm. The development consists of one 200m office tower block, one 100m office tower block and one 100m apartment block.

Wisdom Plaza

Shenzhen China

Wisdom Plaza

Shenzhen China

Wisdom Plaza realizes the concept of “ecological office”; it creates for the city a low-density, luxury-style, low-carbon commercial office. The office towers' four-layer vertical greening, the project achieves the city’s largest greening area and highest green ratio, earning recognition as a global premium-asset exemplar. The façade is inspired by nature—abstract bamboo, sea and waves—using rhythmic forms and material contrasts to create a modern, iconic eco-building. Rounded exterior corners improve daylight and ventilation; full glass curtain walls add a transparent feel. Terraced massing, varied glass and aluminum tones, generous floor heights (4.3–5.2 m), flexible 760/1,200 m² dual-unit floors, 85–88% efficiency, sky-gardens on every floor, and a three-level sunlit basement with atria and light wells enable underground planting and a fully sunlit garage.

Location

The project is located at the intersection of Qiaoxiang Road and Shenyun Road, Nanshan District, Shenzhen.

Project Scale

Spanning a total land area of 37,000sqm, with a GFA of 160,000sqm. The development consists of 2 30m 6 storey HQ office block and 2 100m 24 storey tower office blocks.

HOUSING

Baoan District 27

Shenzhen China

Baoan District 27

Shenzhen China

This project is a high-rise, high density housing project. The design resolves the high FAR and housing unit type requirement from the developer by adopting a skilful housing unit layout that maximizes views, sunlight and natural ventilation. The housing blocks align the perimeter of the land allowing for a large internal garden for the residents. The carparking is strategically placed to allow residents short distance commute to their homes.

Location

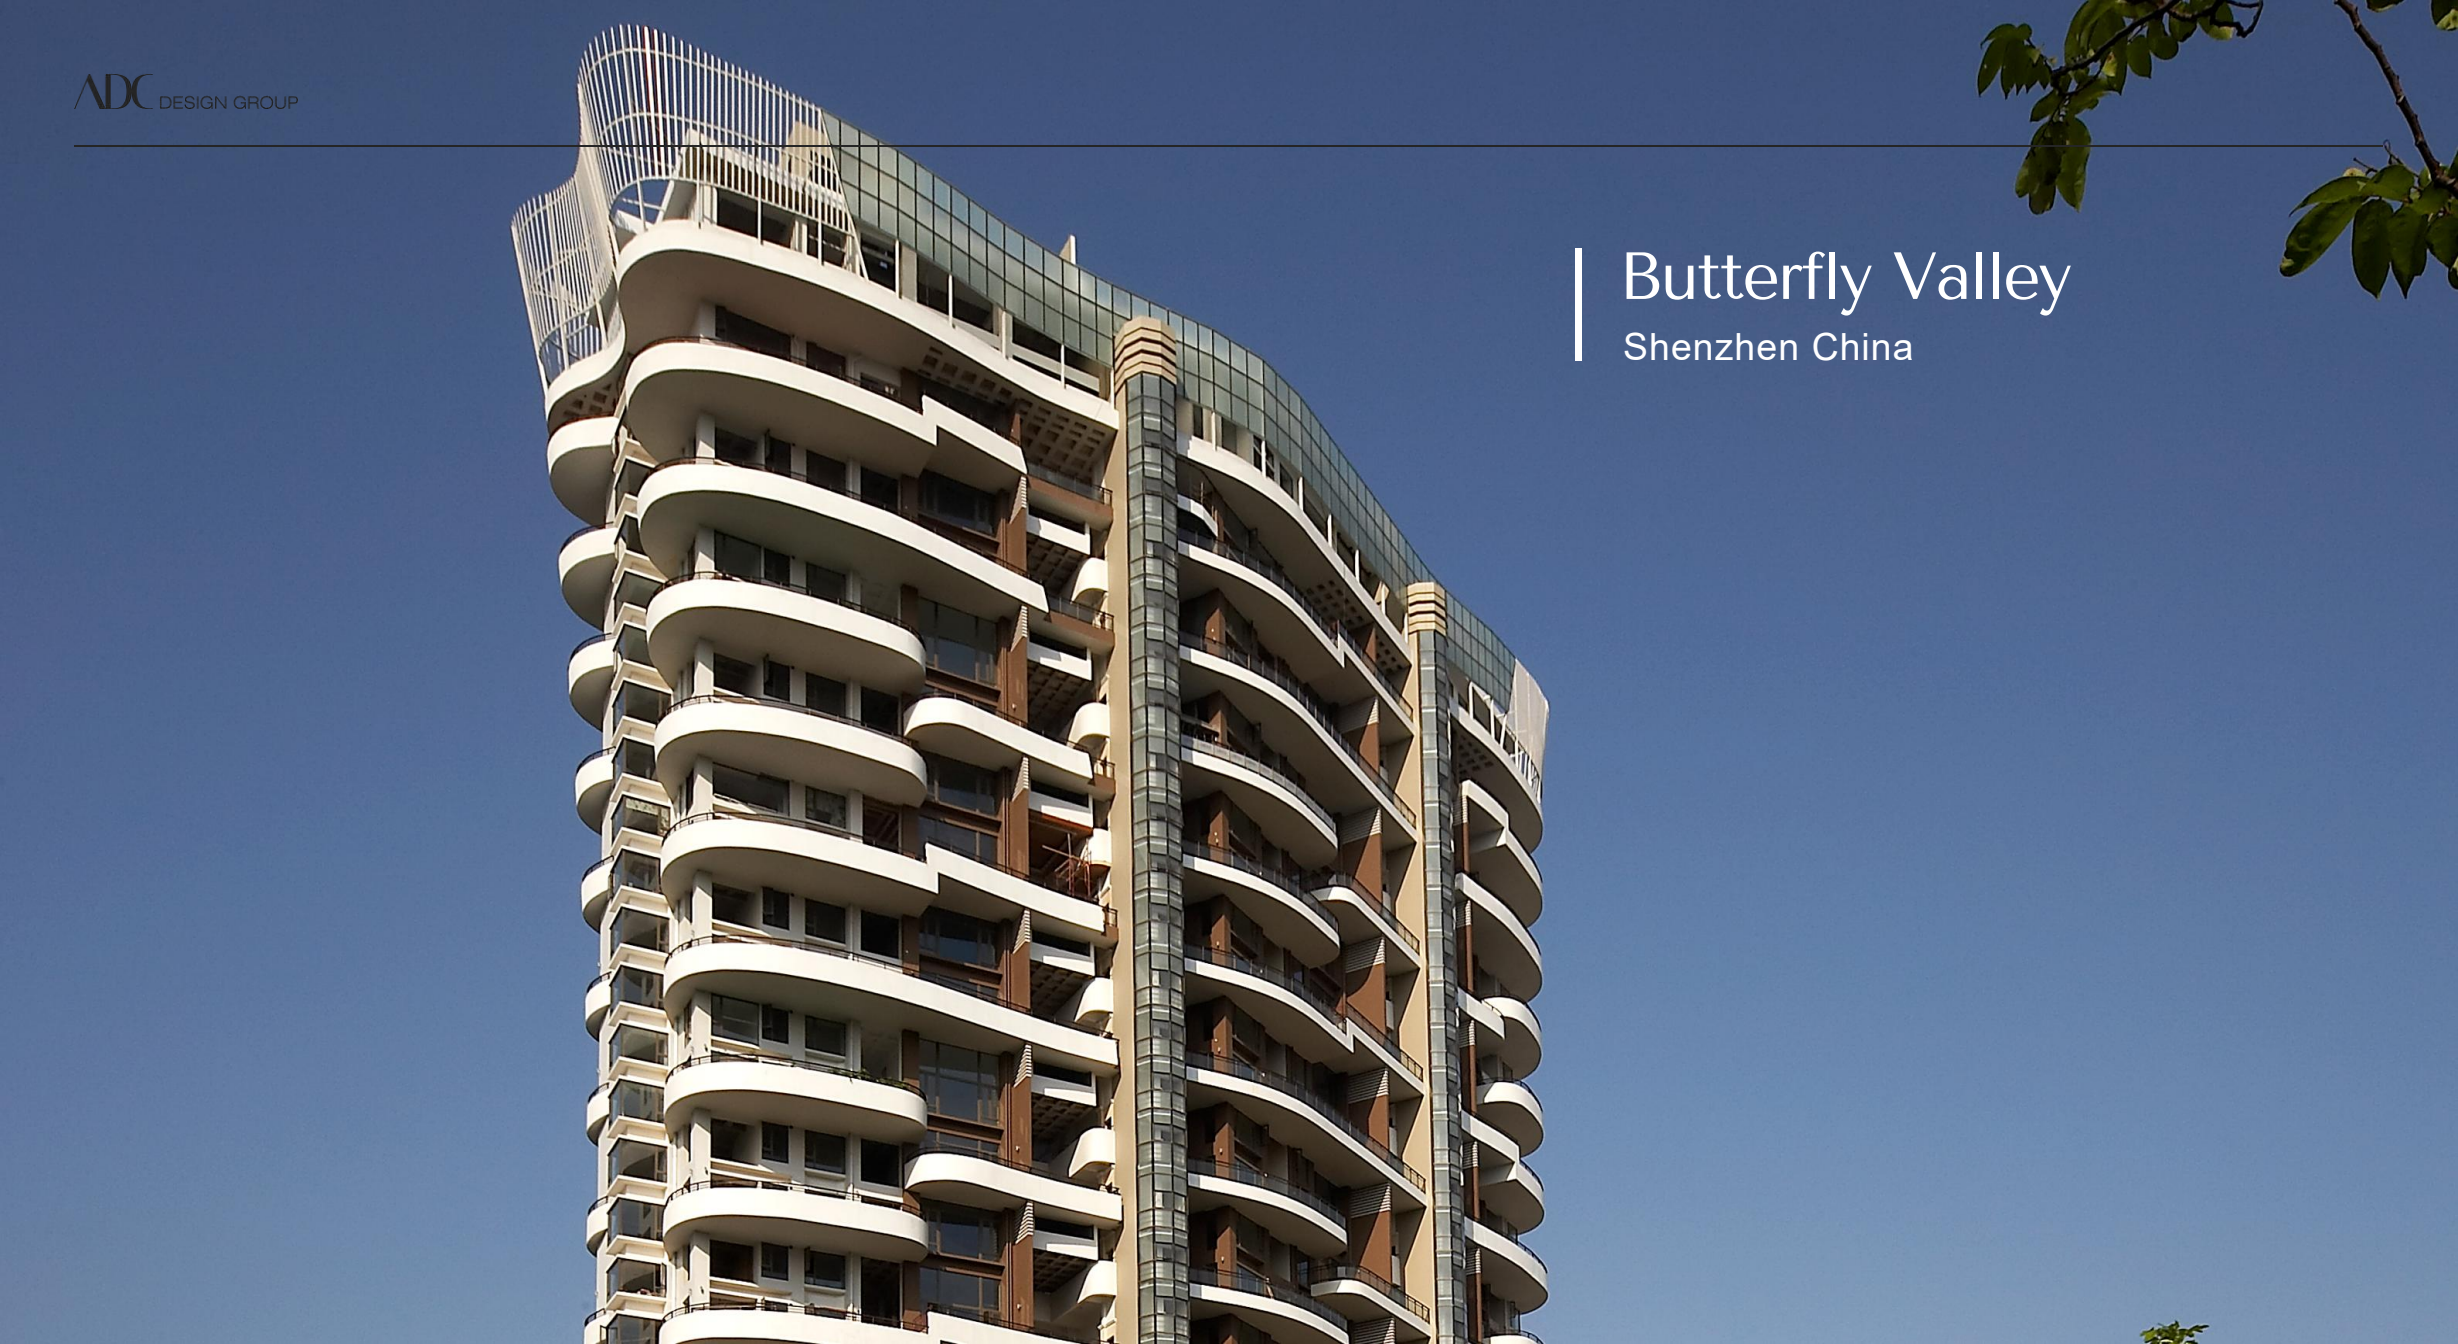

The project is located along Chuangye Er road, Baoan District, Shenzhen.

Project Scale

Spanning a total land area of 37,505sqm, with a GFA of 280,000sqm, the project consists of High-rise housing, retail and a kindergarten.

Components

High-rise Housing, Retail, Clubhouse, Kindergarten

Butterfly Valley

Shenzhen China

Butterfly Valley

Shenzhen China

Located west of Shenzhen's Yuanboyuan Gardens, next to OCT, this 23-story housing tower offers 63 200–380m² luxurious housing units. All face south with cross-ventilation and clear separation of spaces. A 180° garden layout wraps each living/dining room with gardens and internal balconies. Innovative garden connections link living, dining, study, and master bedroom—creating a courtyard feel villa in the sky concept, blending privacy with aerial delight. With 5m double-height living rooms, and record-breaking 22–28m elevational bays, these spacious units define rare sky villas. Winner of Gold Awards at the UN and Innovation Design.

Location

The project is located along Zijing road， Futian District, Shenzhen.

Project Scale

Spanning a total land area of 4,600sqm, with a GFA of 16,000sqm. The 100m housing tower has 63 units.

Capital Gardens

Jiangyin China

Capital Gardens

Jiangyin China

This residential complex features low-density townhouses and three high-rise duplex slab blocks. The design maximizes a central courtyard with landscape architecture that integrates terrain, varied materials, grassy slopes, and stone paths—raised and greened at multiple levels, allowing sunlight into underground spaces for excellent views and natural lighting. The ground floors are elevated and open, creating flexible, functional spaces that blend courtyard gardens with urban surroundings, offering transparency and broad vistas. Rooftop gardens complete a multi-dimensional greening system.

Location

The project is located at the west of Huancheng Boulevard, Lingang District, Jiangyin.

Project Scale

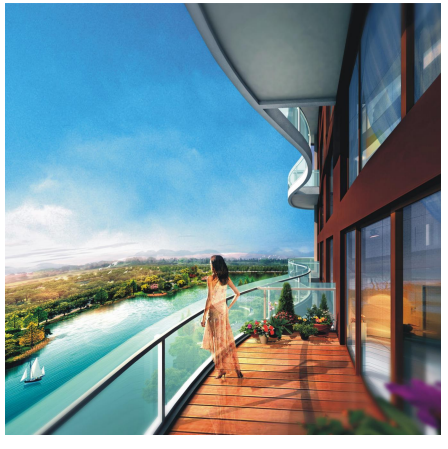

Spanning a total land area of 161,000sqm, with a GFA of 375,000sqm, the project consists of 54 townhouse units and 3 duplexe slab housing blocks.

Components

Townhouses, Duplexes, Clubhouse

ADC DESIGN GROUP

Yunruitai

Shantou China

Yunruitai

Shantou China

Yunruitai transcends Shantou's luxury housing norms with premium design, craftsmanship, and product—bringing many "firsts" standards to the city. The housing blocks' elegant, artistic facade uses aluminum panels with insulated LOW-E glass—typically for 5A offices—ensuring lasting luster. Smooth curved lines echo coastal living. Aluminum-formwork + intelligent climbing scaffolding (first-tier standard) ensures high precision, monolithic casting, crack/leak prevention, and smoother walls, reducing renovation work. The blocks are planned to give residents maximum living spaces and views across the city.

Location

The project is located south of Chunjiang road, Jinping District, Shantou.

Project Scale

Spanning a total land area of 11,600sqm, with a GFA of 40,600sqm. The housing evelopment consists of four 50m slab blocks, anchored parallel along the preimeter of the site.

Xingyang City Planning

Xingyang Zhengzhou China

Xingyang City Planning

Xingyang Zhengzhou China

The planning goals for Xingyang City are: 1) a modern urban complex in the center of Xingyang New Area, linked to Zhengzhou metro; 2) high-quality residential clusters with rich natural landscapes; 3) a mid-to-high-end commercial core for the main business district. Strategies include inserting public service "event points" into homogeneous residential zones to attract urban activities and capital flow. A central heterogeneous functional ring integrates land uses, promoting convergence and circulation. Urban symbiosis along the eastern edge leverages highway networks to integrate blank urbanized areas. Economic land-use operations will make the landscape belt flourish like a living organism's metabolism.

Location

The project is located in Xingyang County, 30km west of Zhengzhou City Centre in Henan Province.

Project Scale

Masterplanning for a total land area of 1,100,000sqm. Projected builtup area of 3,160,000sqm.that consist of numerous housing districts with a main east-west commerical belt.

Connecting past and present, the design weaves traditional Khmer culture with modern techniques. Inspired by Cambodia's lush jungles, leaf textures create strong rhythmic sequences, expressed through natural wood and stone for a simple, earthy feel. The architecture incorporates intricate patterns and regular line arrangements—interleaved with solitary lines—honoring ancient heritage. Red drapes symbolize hope; golden headdresses reflect sunlight, casting cultural symbols across the building.
The color palette balances wood tones, stone, and light-shadow contrasts, accented with green, gold, red, and blue—evoking forests, sky, and ocean for a serene leisure atmosphere. Indoor and outdoor spaces merge with water features and gardens, making architecture and nature interwoven, inviting guests to connect with the environment. The design conveys "characteristic, fashion, simplicity, and leisure"—elegant, creative, relaxed, and modern. atmosphere, ingenious creativity, relaxed and simple fashion

This dining space is designed with French aesthetics as its core, using dark wood and stone mosaic to construct the spatial foundation, interpreting the sense of order and exquisite heritage of French style through orderly design details. The dark wooden work extends from the top structure to the facade cabinet, constructing the spatial framework with a steady and heavy texture, continuing the solemn charm of classical French style; The stone mosaic with geometric patterns on the ground is laid out in a symmetrical and repetitive rhythm, enhancing the sequential rhythm and exquisite style of the space. The space follows a symmetrical and orderly layout logic, with rows of retro lamps hanging evenly along the flow line, forming a rhythmic sequence of light and shadow. The arrangement of each block and display implies orderly rules. The overall atmosphere is infused with French elegance in a gloomy dark setting, constructed with texture collision and orderly details, creating a dining space atmosphere that combines ritual and quality.

Respecting nature and local culture, the design uses red bricks fired from local clay, unifying the interior in simple, natural tones—sublimating from "form" to "meaning." Every detail bears traces of local craftsmanship, telling its own story. Warmth and authenticity permeate the space, embodying "art words all things, inspiration paints life." Low lighting creates a comfortable, natural ambiance, focusing attention on artworks, signs, and tabletops—following "less is more." Light, material, and space together present a light visual feast.

Drawing from ancient texts, the design traces the dragon's evolution—from serpent to jiao (flood dragon), then to horned dragon and winged Ying Dragon over millennia. This mythological journey symbolizes transformation, power, and eternity. The space interprets these stages through dynamic forms, layered textures, and dramatic lighting, creating an immersive environment that echoes the dragon's legendary progression. Guests experience a narrative of growth and majesty, where ancient symbolism meets contemporary casino design for a truly unique atmosphere.

Ancient and modern intertwine, blending traditional culture with contemporary techniques. Inspired by Cambodia's lush jungles, woven leaf textures create strong rhythmic sequences, expressed through natural wood and stone for a rustic feel. Architectural and clothing motifs—regularly arranged lines, intercrossed patterns, and detailed designs—honor ancient culture. Dark green symbolizes fertility; red drapes represent hope; gold headdresses reflect sunlight, casting Cambodian cultural symbols across the space. The result is a sophisticated, luxurious, and leisurely casino environment that respects heritage while embracing modern luxury.

Ancient and modern converge through the interweaving and extension of time and space via contemporary techniques. Ocean-themed design features curved walls with rich visual tension, three-dimensional rock-like linear extractions, and flowing ground materials that echo natural movement. Staggered geometric folding patterns build a sense of temporal-spatial expansion, guiding exploration. The casino adopts a semi-open layout—high, open spaces express grandeur, while semi-enclosed areas ensure privacy. The design balances openness and enclosure with subtle effects, evoking oceanic vastness and life's freedom. Warm, soft light permeates the space, awakening curiosity and reflecting worldly prosperity.

This project uses wood and stainless steel as the core material carriers, and employs modern luxury design techniques to shape the quality and style of commercial public spaces, achieving a balance between warm texture and exquisite sharpness in a flowing spatial order. The design spreads natural wood veneer in a layered and curved form on the facade, with the natural wood texture blending with the surface to create a soft temperature. Paired with antique bronze stainless steel for fine edging and structural outlining, the metallic matte luster blends with a low-key luxury texture under light and shadow, and the collision of cold and warm materials gives the space rich layered tension; The elevator hall continues the material language with a regular stainless steel facade, and perforated light beads and sharp geometric cutting shapes enhance modernity and spatial symbolism. The top surface is outlined with a layered linear light strip to create a sense of depth in the space. The bright stone floor reflects light and shadow, further extending the spatial scale. Local green plants embellish and soften the cold and hard temperament of the metal. The overall design abandons complex decorations and expresses the texture of the material itself, smooth curved forms, and precise light and shadow control, creating a modern luxury commercial space that combines order and experience. It not only meets the functional attributes of flow guidance, but also conveys a refined and high-end spatial atmosphere.

This project features grey wood veneer and grey beige stone as the main color scheme, complemented by antique copper steel and carbon grey components to create a stable and sophisticated spatial system. Gray beige marble or carpet is widely used in walls and floors to lay a clean and transparent foundation; Grey wood veneer provides a soft spatial texture, while antique copper steel is used for elevator door frames and ceiling finishes, bringing a warm metallic texture; Carbon gray is used as an auxiliary color for finishing details and enriching color layers. The perforated ceiling lights create a rhythmic light and shadow effect, with local green plants embellishing and dispelling the coldness of hard materials. The overall color tone is restrained and unified, creating a simple, atmospheric, and business elegant public office space.

This project is designed around the core theme of "ecology, environmental protection, nature, and green", deeply echoing the brand background of the pharmaceutical and health industry that advocates nature and protects life, and integrating the concept of sustainable development into the entire process of space creation. The design is based on low-energy, recyclable and environmentally friendly materials, using warm natural wood veneer to build the main tone of the space, matched with delicate natural stone, restoring the natural touch and visual experience with the original material texture, and practicing the design principles of green and environmental protection from the source; At the same time, by using a layered lighting system to simulate the soft texture of natural daylight, linear wash light strips are used to streamline the spatial flow and order, creating a transparent, relaxed, stable and atmospheric atmosphere in the corporate lobby while achieving efficient and low-carbon operational needs. The overall space adopts a minimalist and restrained modern design approach, dispelling the stiffness of artificial carving and organically integrating natural interest with business functions. It not only showcases the professional and stable brand image of the enterprise, but also fully interprets the long-term value goal of sustainable development through a practical green design strategy.

This project is a light luxury modern style model space, constructed with a core material system of natural wood veneer, white marble, and wood grain stone. The space boundary is softened by a curved shape that runs through the entire area, creating an elegant and refined composite scene that combines business functions and artistic texture. Natural wood veneer lays the foundation for warm tones in the space with a warm texture, while the natural texture of white marble becomes the visual core of the desktop and background wall. The wood grain stone sinks into a simple and layered texture, and the fusion of the three textures interprets the core of light luxury. The space is outlined with curved ceiling light slots and rounded walls to create a soft and orderly flow, eliminating hard edges and corners; The artistic texture background wall injects design tension, with metal edging and dark green soft decoration embellishing details. Under the modern minimalist framework, it presents a high-end, orderly, and warm sample space quality.

The best design brushstrokes can't match the gift of nature to space. People's complex of being adjacent to nature seems to never change, and they long for nature but can't get close to nature, which has become an unrealistic expectation for most urban people. Nature + light luxury represents freedom and prestige, low-key and luxury, and the partner of restrained high-end furniture and dark marble walls. The most can spread out a free flow of space and a rippling beauty. The core of the living room design is to build an open and relatively independent living place, extending the owner's good taste of life, perhaps because it is open enough, the interior decoration has been open to the external scenery, so that the interior space and the natural light can coexist and integrate, making people feel comfortable, elegant, clean and quiet.

Peninsula Bay Hotel Landscape

Sihanoukville Cambodia

Peninsula Bay Hotel Landscape

Sihanoukville Cambodia

The ground floor garden of the Hotel exudes a calm yet refined and luxurious feel. At the main vehicular entry, guests are welcomed by a grand entry roundabout that links the internal roads to the main hotel lobby dropoff, a grand porte-cochère that frames the seaview. The design layout, height compositions and choice of greenery and landscape elements delicately balance privacy and traffic routes; at the same time help to reduce the mass of the hotel building. On the third floor landscape deck the emphasis is on enjoyment and fun in the tropics. The planting reflects a relaxed resort feel. To make sure guests will be able to view the sea, a second storey pool is created with infinity pool effect. A children's play area and pickle ball courts give the guests more activities to choose.

Location

The project is located at 2 Thannou Road, Sihanoukville.

Project Scale

Hotel ground level frontage landscape is 35,000sqm. The third floor landscape deck is 55,000sqm

Longmen Dipai Hot Spring Resort

Huizhou China

Longmen Dipai Hot Spring Resort

Longmen Dipai

The resort's planning and design are themed around Chinese classical music. The layout follows the natural topography, nestled against the mountains and facing the water, with buildings sited in harmony with the terrain. Throughout the resort, the design is closely tied to the musical theme, using Chinese classical music as a narrative device and drawing upon the artistic conception of famous classical pieces as its creative foundation. Integrating the health-preserving effects of music on the mind, body, and spirit—along with the therapeutic benefits of hot springs—the landscape is connected through a series of hot spring pools with distinct functions. This approach achieves a holistic wellness experience, nurturing both the soul and the body, and creating a hot spring resort with a unique cultural character. Dipai Hot Spring Resort Hotel is distinguished by its core offerings: "bathing in wellness springs, listening to heavenly music, and enjoying premium services." It combines an eco-luxury resort hotel, rare bicarbonate hot spring therapy, and high-end conference and entertainment facilities.

Location

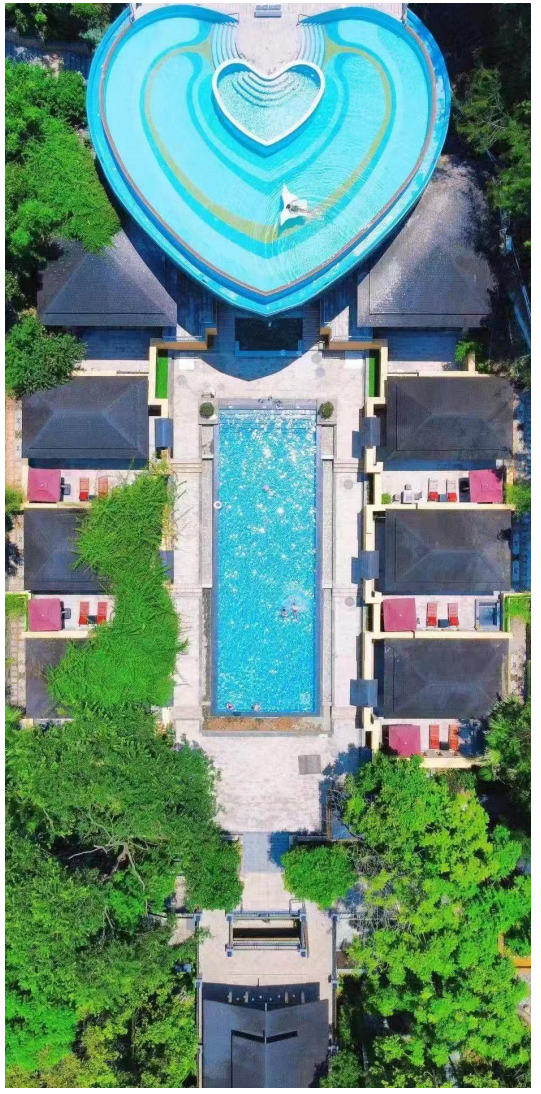

Huizhou China

Project Scale

The project covers an area of 200 mu (approx. 13.3 hectares), featuring 312 guestrooms, 20 villas, 68 hot spring pools, and is complemented by a large swimming pool and water park.

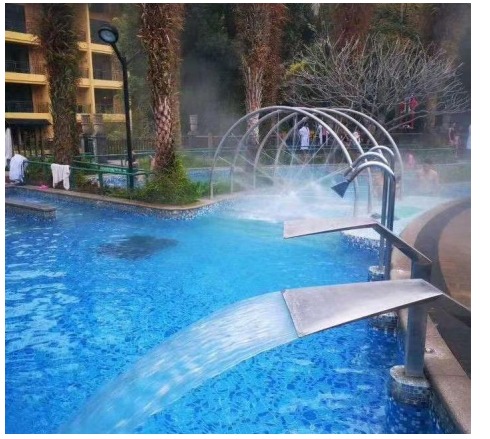

Components

Hotel Conference, Villas, Hot Spring facilities, Water Park
